

**Engineering and Design
SOIL VAPOR EXTRACTION AND BIOVENTING**

Table of Contents

Subject	Paragraph	Page
Chapter 1		
Introduction		
Purpose	1.1	1-1
Applicability	1.2	1-1
References	1.3	1-1
Background	1.4	1-4
Scope	1.5	1-5
Organization	1.6	1-6
Tools and Resources	1.7	1-6
Chapter 2		
Strategy for Using SVE/BV		
Introduction.....	2.1	2-1
SVE/BV Application Strategy	2.2	2-1
Fundamental Principles.....	2.3	2-1
Fundamentals of Vapor Flow in Porous Media	2.4	2-11
Biodegradation Kinetics.....	2.5	2-22
Use of Models in SVE/BV Strategy	2.6	2-24
Chapter 3 Site		
Characterization and Technology Screening		
Introduction.....	3.1	3-1
SVE/BV Technology Options	3.2	3-1
Pre-Design Data Requirements and Technology Screening Strategy	3.3	3-16
Examples of Screening-Level Evaluations of SVE/BV	3.4	3-36
Chapter 4		
Bench- and Pilot-Scale Testing for SVE and BV		
Introduction.....	4.1	4-1
Uses of Bench- and Pilot-Scale Testing in Remedial Design.....	4.2	4-1
Bench- and Pilot-Scale Testing Strategy.....	4.3	4-10
Work Plan.....	4.4	4-11
Test Performance and Data Analysis.....	4.5	4-16
Minimum Test Report Outline.....	4.6	4-36
Examples of Bench- and Pilot-Scale Test Reports	4.7	4-39
Field Criteria for Estimating SVE Feasibility	4.8	4-47

Table of Contents

Subject	Paragraph	Page
Chapter 5		
Design of Full-Scale SVE and BV Systems		
Introduction.....	5.1	5-1
SVE and BV Design Strategy.....	5.2	5-1
Well Locations	5.3	5-7
Overall Pneumatic Considerations.....	5.4	5-24
Well/Trench Construction	5.5	5-35
Piping, Valves, and Manifold System	5.6	5-45
Condensate Control	5.7	5-48
Particulate Filters.....	5.8	5-51
Blower Silencers and Acoustics	5.9	5-51
Blowers and Vacuum Pumps	5.10	5-51
Instrumentation and Process Controls	5.11	5-56
Electrical Systems Planning	5.12	5-59
Summary of Offgas Treatment Methods	5.13	5-66
Summary of Condensate Treatment and Disposal Methods.....	5.14	5-74
SVE/BV System Housing	5.15	5-75
Surface Covers.....	5.16	5-75
Design Considerations for Aboveground Soil Piles.....	5.17	5-76
Process Safety Review	5.18	5-78
Examples of SVE/BV System Designs	5.19	5-82
Chapter 6		
Documents for Design and Construction of SVE/BV Systems		
Introduction.....	6.1	6-1
Applicable USACE Design Policy and Requirements	6.2	6-1
Design Document Components	6.3	6-1
System Construction and Construction Oversight.....	6.4	6-5
Chapter 7		
Commissioning and Start-up		
Introduction.....	7.1	7-1
Collection of Baseline Data	7.2	7-2
Equipment Shakedown and Testing	7.3	7-3
System Start-Up/Full-Scale Demonstration.....	7.4	7-10
Data Evaluation and Start-Up Report.....	7.5	7-20

Table of Contents

Subject	Paragraph	Page
Chapter 8		
Operations and Maintenance		
Introduction.....	8.1	8-1
O&M Strategy.....	8.2	8-1
Monitoring.....	8.3	8-4
Venting Well Maintenance.....	8.4	8-15
Vapor Collection System OM&M Considerations.....	8.5	8-16
System Operation Schedule.....	8.6	8-17
Recordkeeping	8.7	8-17
System Evaluation/Modifications/Optimization.....	8.8	8-18
Troubleshooting.....	8.9	8-19
OM&M Protocols	8.10	8-20
Chapter 9		
System Shutdown and Confirmation of Cleanup		
Introduction.....	9.1	9-1
Shutdown Strategy	9.2	9-1
Sampling and Analysis.....	9.3	9-3
Typical Data Trends	9.4	9-3
Evaluation of Results.....	9.5	9-5
System Shutdown Checklist.....	9.6	9-8
Closure Report	9.7	9-9
Long-Term Monitoring Requirements.....	9.8	9-9
Rebound.....	9.9	9-10
Chapter 10		
Cost Estimating		
Introduction.....	10.1	10-1
Cost Estimating Strategy.....	10.2	10-1
Cost Estimating Approaches.....	10.3	10-2
Cost Estimating Checklist.....	10.4	10-3
Chapter 11		
Other Considerations		
Regulatory Issues.....	11.1	11-1
Patent Issues.....	11.2	11-1
Safety	11.3	11-4
Contracting	11.4	11-4

APPENDICES

- A REFERENCES**
- B PROPERTIES OF COMMON ORGANIC POLLUTANTS**
- C MODELING**
- D RECOMMENDED ESTIMATION METHODS FOR AIR PERMEABILITY**
- E ANALYTICAL SOLUTION FOR TWO-DIMENSIONAL FLOW TO A WELL**
- F OVERVIEW OF REBOUND TEST PROCEDURES AND DATA EVALUATION**

INDEX
